Please Note:

Unfortunately, due to shipping and regulatory restrictions, **we are unable to ship rewards to any European country or region, including the United Kingdom, EU member states, Switzerland, and Norway.** Please confirm that your shipping destination is eligible before pledging.

For backers in the United States, rewards are generally expected to be shipped on a DDP basis. For all other eligible countries and regions, rewards will generally be shipped on a DDU/DAP basis.

Import duties, VAT, customs fees, local taxes, and carrier handling fees are not included in the pledge amount or shipping fee and may be charged upon delivery. Customs regulations and fees vary by country and region, so please check your local import requirements before pledging.

Any customs duties, taxes, or carrier fees are outside our control and are the responsibility of the backer.

ABOUT SKIP INTRO

Preparation, cleanup, dirt—we help you skip the hassles and get straight to what you came for.

SKIP INTRO creates tools that reduce the time, effort, and stress surrounding outdoor adventures, so you can focus on the moments that truly matter.

Just as you would skip an intro and dive straight into the main story, we envision a world where you can immerse yourself in the outdoors without delay.

That is the new standard of outdoor living we aim to create.

WHY KICKSTARTER?

Create a new outdoor standard: clean up before heading home.

After surfing, camping, or any outdoor adventure, muddy and sandy gear often gets loaded straight into the car. The result is an uncomfortable ride home, lingering odors, a dirty vehicle, and even more cleanup waiting for you later.

Existing pressure washers are often too large and heavy to carry outdoors—and many require access to both electricity and a water faucet. Bottles and buckets are portable, but they rarely provide enough pressure to remove stubborn dirt.

That is why we developed POWASH 3.0: a lightweight, cordless pressure washer designed to let you clean up right where the adventure ends.

only the memories home.

Your support will help us bring POWASH 3.0 into production, refine the experience through real feedback from outdoor enthusiasts, and make this new outdoor standard available to people around the world.

Together, let's skip the cleanup stress and get straight to what matters.

Thank you

Thank you for believing in POWASH 3.0 and the future we are working to create.

Every pledge, comment, and share brings us one step closer to making outdoor adventures simpler—from the moment they begin to the moment you head home.

Together, let's skip the hassle and get straight to the experience.

—The SKIP INTRO Team

Risks and challenges

Bringing a hardware product to life always comes with challenges.

As outdoor enthusiasts ourselves, we understand how

While we have already completed product development, prototyping, and supplier selection, several risks remain as we move toward mass production.

Manufacturing & Production

Mass production can sometimes reveal challenges that are not visible during prototype testing.

To reduce this risk, we have completed multiple rounds of product validation and are working closely with experienced manufacturing partners.

Our team will continue conducting quality inspections throughout the production process to ensure consistency and reliability.

Supply Chain & Components

Unexpected shortages of electronic components, batteries, or materials can impact manufacturing schedules.

To minimize potential delays, we have established relationships with qualified suppliers and are planning inventory procurement in advance whenever possible.

Global Shipping & Logistics

or global logistics disruptions.

While these factors are outside of our direct control, we are working with experienced fulfillment partners to reduce delays and maintain smooth delivery operations.

Product Improvements

As we move into final production, small improvements may be made to materials, packaging, or manufacturing processes.

Any changes will only be made if they improve product quality, durability, or user experience.

The core functionality and design philosophy of POWASH 3.0 will remain unchanged.

Our Commitment

We believe transparency is one of the most important responsibilities of any Kickstarter creator.

Throughout development, production, and fulfillment, we will provide regular updates and openly communicate any challenges we encounter.

Our goal is simple:

Deliver POWASH 3.0 to our backers as quickly as

Thank you for supporting our journey.

[Learn about accountability on Kickstarter](#)

Use of AI

I plan to use AI-generated content in my project.

What parts of your project will use AI generated content? Please be as specific as possible.

We used AI-assisted tools to support campaign translation and the creation of certain marketing visuals for this Kickstarter campaign. All product design, engineering, functionality, specifications, manufacturing decisions, and product development were created entirely by our team without the use of AI. Any AI-assisted content was used solely to help communicate the product and campaign more effectively.

Do you have the consent of owners of the works that were (or will be) used to produce the AI generated portion of your projects? Please explain.

We used commercially available AI tools for translation and marketing image creation only. We did not train any AI models or use third-party copyrighted

Environmental commitments

[Visit our Environmental Resources Center](#) to learn how Kickstarter encourages sustainable practices.

Long-lasting design

POWASH 3.0 is designed for long-term outdoor use.

Rather than creating a disposable product, we focused on durability, portability, and everyday usability. By designing a product that users can rely on for years of outdoor adventures, we aim to reduce unnecessary replacement and waste.

Something else

Helping outdoor gear last longer.

POWASH 3.0 makes it easy to clean outdoor equipment immediately after use, helping remove sand, mud, salt, and dirt before they cause unnecessary wear and damage.

[Back this project](#)

camping equipment, hiking gear, bicycles, and other outdoor products, we believe POWASH 3.0 can help extend the lifespan of the equipment people already own.
