PORTALO: The Portable Pressurized Water Sprayer

A compact water system with an integrated hose and hands-free use for personal hygiene, sandy feet, muddy gear, and quick cleanups.

Story

Together we crossed the \$50K mark in less than 15 days
! Thank you to every single one of you!

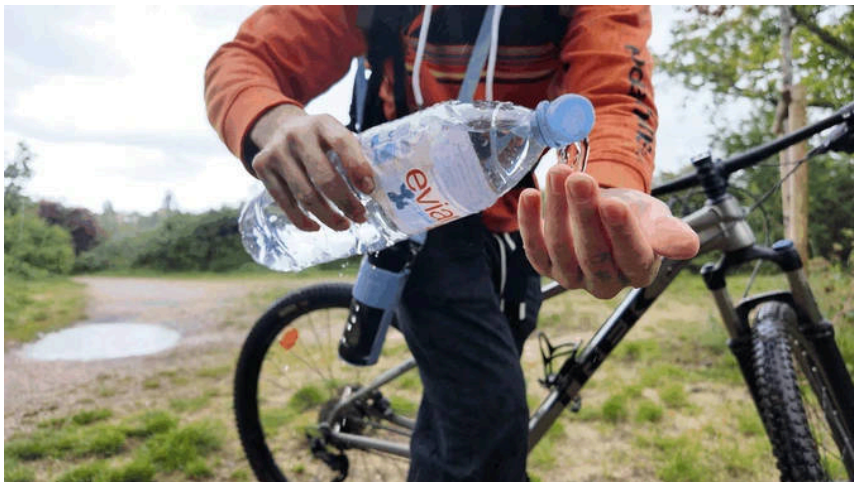

Thanks to your support, new colors are now in

Road to 60K

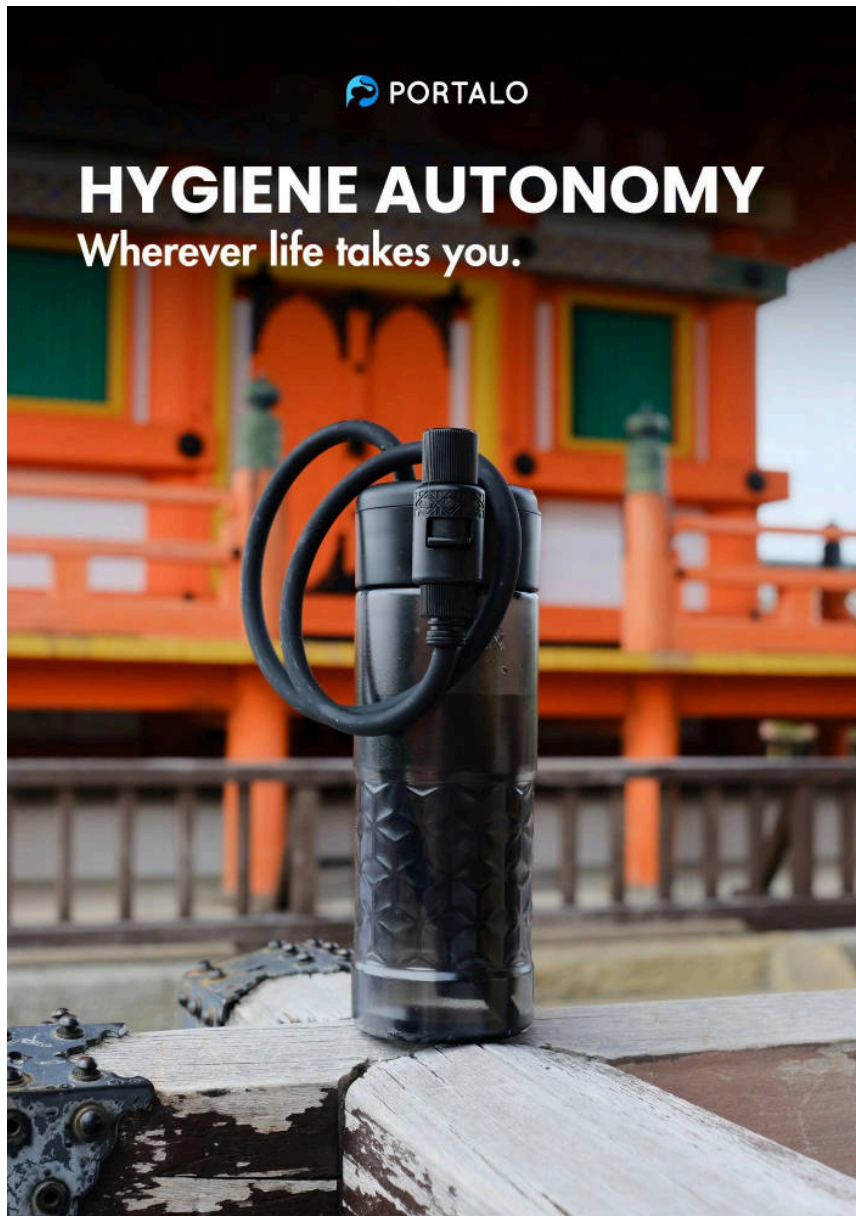

I started working on this project during my engineering studies in 2022, after noticing something weird in our everyday lives.

We all rely on running water every day to stay clean. But what happens when the tap isn't where you need it?

I'm Karim, a 24-year-old French product design engineer, and since 2022, I've been working on one question: how do you bring that same comfort anywhere?

A compact manual high-pressure water system for hygiene and quick cleanups anywhere

[Back this project](#)

Personal care

Clean up
without a sink

Travel-ready

Easy to carry,
ready to go

Outdoor

Reliable when
facilities are limited

Back PORTALO Now

After four years of development, we designed the ultimate portable system to deliver a pressurized jet anywhere, from a small water reserve, without electricity or disposable consumables.

410 ml BPA-Free

5 quick cleanups on
the go

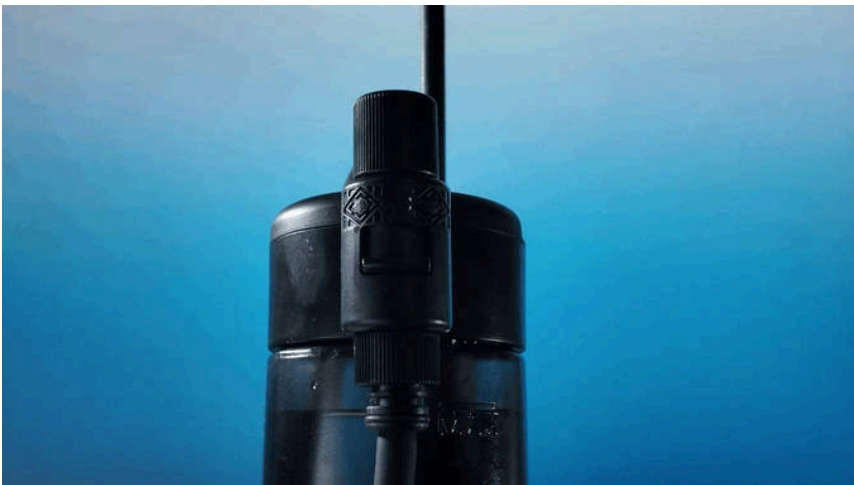

Retractable hose

Reach what you need
to clean

HOW IT WORKS

The system becomes completely functional in just 10 seconds with no complex mechanism or electricity needed.

FEATURES

Direct jet for powerful cleaning. Mist for refreshing and gentle rinsing.

Spray head clips magnetically to the bottle and rotates in any direction.

Place it down, point it where you need it, and your hands stay free.

What can you use it for?

Travel & camping

Kids & parenting

Personal hygiene

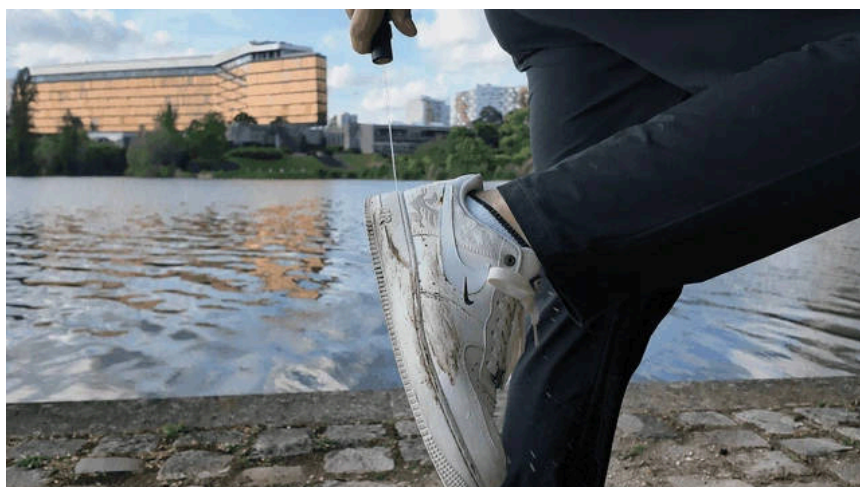

Sports & gear

Beach & sand

Everyday cleanups

only paper for our most intimate hygiene?

A small bidet hose next to the toilet is common in many countries. But what happens when there isn't one?

Portable bidets already exist, but I was never really satisfied with them. So I ignored the usual limitations and designed my own around everything I wished a portable bidet could do.

How does PORTALO compare to other portable solutions?

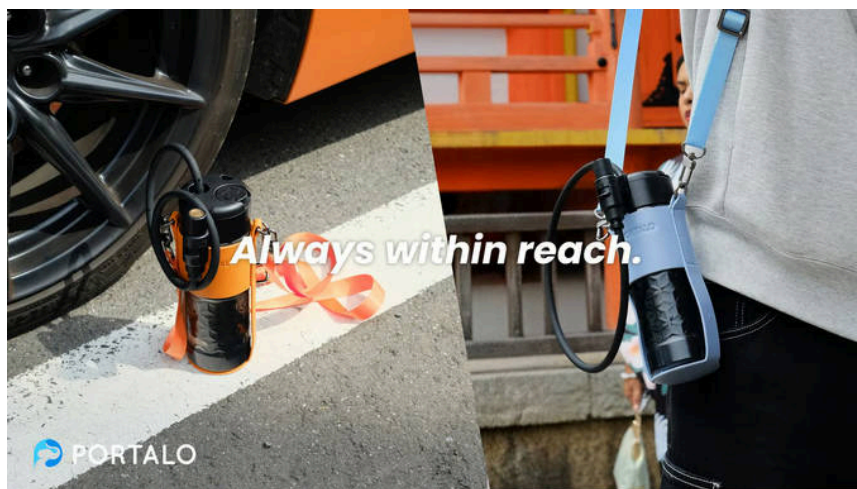

[Back this project](#)

	PORTALO	Squeeze bottle (XL)	Typical electric portable bidet
EXPERIENCE			
What you handle	Light nozzle	Whole bottle	Whole unit
Water flow	Continuous	Squeeze repeatedly	Continuous
Spray direction	360° / Any direction	Mostly upward	Mostly upward
Spray shape	Focused to wide	Fixed shower head	1–2 preset modes
EFFICIENCY & HARDWARE			
Pressure	Up to 3 bar	Grip-dependent (<0.5 bar)	0.5 – 1.5 bar
Flow rate	~234 ml/min	Variable (~600–900 ml/min)	~400–700 ml/min*
Water capacity	410 ml	480 ml	380–530 ml*
Runtime per fill	~120 s	~30–45 s	~45–80 s*
Power source	Manual air pressure	hand squeeze	Lithium battery
Dimensions (packed)	240 × Ø66 mm	280 × Ø70 mm	~150–220 × Ø68 mm
Weight (empty)	205 g	~120 g	~250–350 g
*Electric portable figures based on published tank capacities and maximum flow rates of leading high-flow market models. Squeeze bottle metrics reflect standard 480 ml XL soft-reservoir designs.

At home, you have a sink. Outside, you have the ground.

So we gave your PORTALO something you never set down.

Sling it across your body. The nozzle docks magnetically. The strap holds it upright and ready. Both hands free, running water on demand. A sink that travels with you, whatever's under your feet.

11 Iterations of Innovation

PORTALO started in 2022 inside a student dorm. The first prototype was very simple: a modified garden sprayer

prototype was bulky and far from the final vision, but one thing became immediately clear: the pressure worked.

That first experiment became the foundation for years of product development. PORTALO evolved through 11 different prototypes of simplifying before reaching the current final version.

After years of development, PORTALO is now patent pending internationally under the PCT, protecting the core innovations behind its unique mechanical design.

Recognition & Validation

As development progressed, PORTALO also began receiving international recognition.

KICKSTARTER

"Great product! I'm looking forward to your launch."

Karim Ali, Founder of PORTALO With
Everette Taylor, CEO of Kickstarter

Appreciated by Kickstarter CEO, Everette Taylor

At the CoCreate Pitch event, Everett Taylor, CEO of Kickstarter, praised PORTALO, offering strong encouragement for the product and its upcoming Kickstarter campaign.

PORTALO won its first global prize at the Alibaba CoCreate Pitch 2025, standing out among 30,000 applicants. The product's innovative design was validated by the industry expert Éric Larchevêque, co-founder of Ledger.

Featured at Concours Lépine 2026

PORTALO is proudly displayed at the prestigious Concours Lépine 2026 at the Paris Fair. Attendees can experience the high-pressure jet in action, see the final product firsthand, and join the priority list for early access before the official launch.

FAQ

Is PORTALO just another squeeze bidet?

No. Squeeze bidets require you to hold and squeeze the bottle while using them. PORTALO is pressurized first, then delivers a continuous controlled stream through a lightweight shower head and retractable hose.

Do I have to keep pumping while using it?

battery.

How long does one fill last?

Up to **2 full minutes of continuous water flow** from less than half a liter of water. **One of the longest runtimes in its size class.**

How does it work in a public toilet?

The **60 cm retractable hose** lets the bottle stay beside you while only the small shower head goes where you need it. No need to hold or turn the whole bottle upside down.

Why not use an electric portable bidet?

Removing the motor and battery leaves more room for water at the same size, requires no charging, and keeps the system mechanically simple and maintainable.

Why choose this over a cheaper portable bidet?

Cheap portable bidets are great when minimum size and weight are the priority. PORTALO was designed around a more complete experience of **continuous pressure, longer runtime, a separate shower head, retractable hose, adjustable spray and hands-free use.**

Risks and challenges

manufactured in a first batch, presented to the public, and sold during Concours Lépine.

The main risks are now related to production consistency, final quality control, international shipping, and small product adjustments based on real user feedback from the first units. We have already shared these observations with our manufacturing partner so they can be corrected before the next production run.

To reduce these risks, we are working directly with our industrial partner on assembly details, finishing, leak testing, component quality, and pre-shipment inspection. As with any physical product, delays can still happen during manufacturing, quality control, transport, or customs clearance.

We will keep backers informed throughout the process and will only ship units that meet our quality standards. PORTALO already exists; the challenge now is to scale production cleanly and deliver it reliably.
